

OIL AND GAS

TESTED AND TRUSTED

ERICKSON 

Safe, reliable aerial transport of equipment and personnel where and when you need it

Delivering success to Upstream O&G Producers means providing safe and reliable aerial services at a fair price. We stand ready to reduce the risk and variability in Exploration by meeting completion targets on time, within budget, and without accidents or incidents. Erickson works hard to exceed the expectations of our customers each and every day we're on the job with a best in class reliability and safety record.

We are highly experienced in austere and remote environments worldwide. Erickson crews work with customers and aviation authorities to reduce cost, promote safety and be environmentally responsible. Our objective is maximum uptime availability and customer satisfaction. Erickson provides passenger and cargo transport, along with SAR and Medivac services, both onshore and offshore. Our external load capabilities are known throughout the world due to our iconic S64 Aircrane. Erickson is both the manufacturer and the world's most experienced operator of the Aircrane, and we have engineered many improvements to this Standard Category commercial helicopter to make it the safest and most reliable heavylift option available for the Oil and Gas arena.

The Aircrane and our fleet of medium and light helicopters provide a specific multi-platform, turnkey service, supported by best in class logistical support. We match the right OGP aircraft or fleet combination to each client's unique set of needs. Erickson is a type certificate holder, manufacturer, and OEM support facility for multiple helicopters and as such we maintain a parts inventory and internal supply chain that is geared to keep our operating fleet in constant readiness worldwide.

Onshore or offshore, Erickson provides a teamwork approach to solving problems and providing solutions.

- Below the hook project and load management services
- Personnel and equipment support in the harshest environments safely and on time
- Global leader in external load capabilities with the S-64 Aircrane platform
- Decades of successful experience with Oil and Gas exploration, production and service support
- Customized ERP Integration
