

TAKE YOUR CAREER TO NEW HEIGHTS

Trusted by heavy-lift operators worldwide, Erickson extends rotorcraft life, advances safety, and cultivates innovative solutions for high-demand fleets by manufacturing quality components, delivering on-time MRO services, and mission-critical upgrades.

As the OEM of the S-64 Air Crane® helicopter, Erickson brings more than 50 years of experience modernizing legacy fleets for the heavy-lift demands of today.

WE ARE ERICKSON. TESTED AND TRUSTED®.

THE S-64 AIR CRANE® HELICOPTER

The S-64 Air Crane® helicopter has been Erickson's flagship aircraft since founder Jack Erickson created the company in 1971. The aircraft began its tenure in the logging industry, then quickly expanded into additional heavy-lift markets (powerline, HVAC and precision placement projects.) Today, the S-64 is widely known for its aerial firefighting capabilities and advancements in the arena.

Below is some basic information on the S-64E and S-64F models.

THE S-64 AT A GLANCE

E MODEL

POWER PLANT

2 ERICKSON JFTD12A-4A
